La 99 is our flagship model. It is a robust and manoeuvrable bike trailer.

The carrying case of La 99 is made of riveted aluminium fitted with lockable fasteners. No need to worry about your grocery shopping or your equipment!

Our hook fixing system allows quick installation as it only takes 30 seconds. It can be easily removed and stored in the trailer for a compact storage. It is strongly recommended because it is 100 % reliable and makes it possible to use both bike bags and our trailer.

We offer special bags designed and manufactured especially for CYCOBORE by *Remise à Flot*. These highly resistant handbags will make the transportation of your goods easier.

Finally, if you feel concerned about the future of our planet, please be reassured: from development and production to shipment, we are committed to minimizing our environmental footprint. La 99 is 100% produced in France, in La Rochelle.

In a nutshell, La 99 is the ideal bike trailer for everyday use.
